- Module 1: Fundamentals of Data Science 
- Module 2: Python Basics & Statistics
- Term 1 Project
- Module 2-3 Numpy and Pandas
- Module 4: Data Visualization in Python
- Module 5 | Exploratory Data Analysis with Python
- Module 6 | Project Guidelines

What REALLY is Data Science Told by a Data Scientist

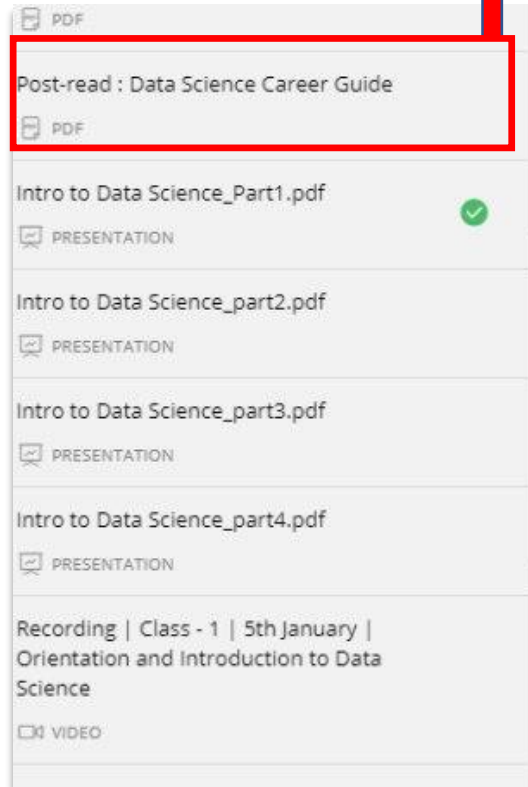

NEXT

We provide **Pre-reads** that are read prior to the lectures so that it can help in succumbing the concepts clearly.

The screenshot displays a course interface. On the left, a blue sidebar contains the following sections: 'Term 1: Data Analytics with Python-Jan'19', 'Chapters', 'Achievements & Progress' (showing 1/29), and 'Discussion'. Below these is a search bar labeled 'Search by lesson title'. The main content area is titled 'Module 1: Fundamentals of Data Science' and lists two items: 'What REALLY is Data Science Told by a Data Scientist' (with a video icon) and 'Pre-read : 50 Years Data Science' (with a PDF icon and highlighted by a red box). A red arrow points from the 'Pre-reads' text above to the highlighted item. The video player on the right shows a man speaking, with the title 'What REALLY is Data Science Told by a Data Scientist' at the top. A green 'NEXT' button is at the bottom right.

We provide **Post-reads** after the lecture to get detailed information about a particular topic.
